

10G optical module ZTE

Overview

The ZTE 10Gb 1310nm SM 10KM SFP+ Module is a high performance optical transceiver, designed for single-mode fiber links up to 10km. Compatible with ZTE equipment, it is ideal for telecommunications infrastructures, data centers and carrier networks that demand speed, stability. This ZTE SFP-10GE-S10K compatible SFP+ transceiver supports 10GBase-LR and 10GBase-LW throughput up to 10km over single-mode fiber (SMF). It operates at a 1310nm wavelength and features an LC duplex connector. Ideal for telecommunication networks requiring high speed and efficiency. The S10K in the name refers to 10-kilometer reach, as opposed to ZTE's SFP-10GE-S20K which covers. The ZTE Compatible 10. 25G-RX transceiver module is specifically designed for 10Gigabit Ethernet Passive Optical Network (10G EPON & EPON) system.
