

10kV strip busbar commissioning

Overview

Insulate the cast resin busbar trunking system from the connections to transformers, switches, meters, and so on. Check all suspensions. This busbar test is prepared to carry out various pre-commissioning tests to be conducted in a systematic manner for Panel Bus bar to ensure the healthiness and performance of the Bus Bar This procedure covers the Pre commissioning test for Bus Bar as for the following Ensure proper earthing and. 1) One package contains 2 busbar supports including inlay parts for bar thickness 5 mm and lateral finger-safe covers. The purpose of this method statement is to outline the sequence and method of Testing & Commissioning of Bus Bar Trunking system. Following tools and equipment shall be arranged before the activity. Through the guidelines contained herein so as to ensure that the job execution complies with the project requirements and serves the. Busbar protection (BBP): Protection intended to detect and operate to clear faults on a busbar. As “junction points” present at all voltage levels and carrying energy in electric power systems, power substation buses are critical to system topology.
