

200kWh energy storage cabinet for cloud computing use

Overview

This all-in-one ESS integrates a high-performance PCS, LFP battery modules, intelligent BMS, and a cloud-based EMS to provide reliable, safe, and efficient energy storage. The outdoor cabinet-type photovoltaic storage system, boasting a power rating of 100kW/200kWh, seamlessly amalgamates energy storage batteries, PCS, power distribution, temperature regulation, fire safety measures, water-immersed door sensors, and monitoring and communication tools. It integrates battery storage, PCS, and energy management, supporting multiple work modes such as peak shaving, load shifting, energy storage, backup power. All. Designed for integration into large-scale energy storage systems, this high-voltage rack offers a dependable 200kWh lithium ion battery capacity built on lithium iron phosphate modules. This has led to an increased interest in energy.
