

20kW power supply for communication site used for distribution network automation

Overview

Achieves efficiency greater than 98%, which helps save utility and cooling costs without compromising performance or reliability. 20kVA/20kW double-conversion on-line pure sine wave rack/tower UPS Ideal for servers, storage, voice/data networks, medical labs, and light industrial applications Rack/tower convertible (SRTGRK1 rail kit sold separately) Delivers clean power with zero transfer time for critical or sensitive devices Add up to 4 external battery packs (SRTG192XLBP2). Intuitive interface provides detailed and accurate information with the ability to configure locally. 1. EPO terminal The Emergency Power Off (EPO) terminal allows the user to connect the UPS to a central EPO system. 2. MBS terminal Maintenance bypass signal. Connect MBS cable to UPS before maintenance switch turned on. Pull out the MBS terminal when necessary to maintain the UPS. 3. BAT_T terminal Battery temperature sensor. 4. RS232 port The seri.
