

90-degree right-angle parallel bend in cable tray

Overview

The 90 degree bend for 50mm Premier tray HDG is a robust elbow fitting designed for creating right angle turns in cable tray runs. Manufactured from hot dip galvanised steel, it provides excellent corrosion resistance, making it suitable for both internal and external applications. How to make a 90 electrical cable tray bend to measurement of your choice. more Audio tracks for some languages were automatically generated. Construction of a flat 90° bend (A) The amount of tray lip to be removed is equal to 2, 3/4 the width of the tray, half of this measurement will be removed on either side of the centre line. To remove the lip we can use a small hand grinder (B) or a file. Students trading aid on how best to put an internal 90 degrees bend in steel cable tray.
