

AdSS optical cable anti-vibration whip manufacturer

Overview

AFL's AVD Series Spiral Vibration Dampers are designed to eliminate the damage caused by Aeolian vibration and reduce overall vibration on bare All-Dielectric Self-Supporting (ADSS) cables. Our comprehensive range of fittings and accessories ensures secure, reliable, and efficient installation and long-term performance of overhead fiber optic. Function: Use its anti-vibration part to dampen wind vibration, consume or attenuate the vibration energy generated by the laminar wind during the operation of the optical cable, and prevent the damage of the hardware and the optical cable. Purpose: Suitable for ADSS optical cable. Note: The spiral anti-vibration rod is made of material with high-strength, anti-aging, high-elasticity, and flame-retardant solid polyvinyl chloride, which is convenient and quick to install. When the damper is placed on a vibrating conductor, movement of the weights will produce bending of the steel strand. The grip section (small aperture section).
