

Advantages of Direct Fiber Optic Connection

Overview

Fiber optics can handle more users and more data at consistently higher speeds. At peak times, your ISP may lower your cable speed from 100Mbps to 20Mbps or lower to ration their service. Fiber optic cable internet doesn't need energized lines, so it's not as prone to outages as cable internet. With speeds up to 1 Gbps, getting what you want online has never been faster. Even though fiber-optic internet service is a relatively new option for homes and businesses in the US, the technology powering it isn't new at all. This is fundamentally different from older technologies like cable and DSL, which rely on electrical signals sent over copper wires, leading to slower speeds and. A Fiber Optic Cable is used to transmit data through fibers (threads) or plastic (glass). There are many advantages of using these cables over other kinds of communication cables, like the. Advantages of fibre optics – High-speed with FRITZ! Fibre optics makes it possible: super-fast and stable internet for binge-watchers, home office heroes, gaming nerds and everyone who enjoys a speedy online experience.
