

Aggregator Core Switch 16 Ports

Overview

The ONV33168FM is a gigabit L2+ managed Ethernet fiber switch independently developed by ONV. It has 8*10/100/1000Base-T adaptive RJ45 ports and 8*100/1000Base-X uplink SFP fiber ports. Each port can support wire-speed forwarding. US-16-XG offers four RJ45 ports that support 10GBASE-T, the standard for 10 Gbps connections using Cat6 (or higher) cabling and RJ45 connectors. The ONV33168FM has L2+ full network management function, supports. As a 10G switch with full SFP+ ports that seamlessly integrates into the Omada Software Defined Networking (SDN) platform, SX3016F allows for remote and centralized management, anywhere, anytime. CRS317-1G-16S+RM is powered by a next generation switching chip, giving you wire speed. The UniFi Switch 16 XG is a fully managed 10 Gigabit aggregation switch, delivering robust performance and intelligent L2 switching. Brief content visible, double tap to read full content.
