

Albanian Yin-Yang Fixed Optical Attenuator

Overview

These are fixed 20dB attenuators in the yin-yang (binaural) style with female to male connectors. They work at both 1310nm and 1550nm wavelengths with excellent return loss ($\geq 60\text{dB}$) and precise attenuation accuracy. The attenuation value is adjustable. This range of fixed attenuator is mainly used to reduce. MU Single Mode Yin And Yang Type Fixed Optical Attenuator Yin And Yang Type Fiber Optic Fixed Attenuator is one end of the connector type and the other end of the adapter type, and the attenuation value is adjustable. It does not introduce attenuation normally, but suddenly increases attenuation when encountering external interference. From the perspective of microwave networks, an attenuator is a. Network technicians and fiber optic installers, this 10-pack of LC/UPC attenuators is exactly what you need for managing signal levels in your fiber optic systems.
