

Armored Pigtail Cable Broadcasting

Overview

Armored Pigtail: enclosed with stainless steel tube or other strong steel inside the outer jacket, armored fiber optic pigtails provide extra protection for the fiber inside and added reliability for the network, while reduce the unnecessary damage caused by rodents, construction. Armored Pigtail: enclosed with stainless steel tube or other strong steel inside the outer jacket, armored fiber optic pigtails provide extra protection for the fiber inside and added reliability for the network, while reduce the unnecessary damage caused by rodents, construction. Fiber optic waterproof pigtails can be used in harsh environment. It is mainly used in outdoor connection of the optical transmitter. Waterproof fiber pigtail is designed with a stainless steel strengthened waterproof unit and armored outdoor PE jacketed cables. The product range covers both single mode and multimode patch cords and pigtails. Fiber optic pigtail are utilized to terminate fiber optic. Armored fiber patch cables feature a specialized jacketing that increases the durability of fiber cables.
