

Asia Telecom Invisible Fiber Optic Cable

Overview

FTTH micro fiber optic cable designed for the invisible optical fibre network. The cable is made with PVC with hot melt glue as jacket material, and the fiber type is single-mode with G. It has 1 core and the cable bending radius is 5mm, making it an ideal choice for. FTTR, or Fiber to the Room, is a networking technology that extends fiber optic connectivity directly into every room of a home or office. By utilizing advanced technology, this innovative cable enables faster and more reliable data transmission, meeting the increasing demands of. The 0.9mm Nylon PVC Self Adhesive Transparent FTTH FTTR Invisible Fiber Optic Cable represents the cutting-edge of modern fiber optic technology, providing an innovative and efficient solution for high-speed internet connections in residential and commercial settings.
