

Austria 960-core optical fiber junction box

Overview

This 960 Core dome fiber joint closure is designed for fiber optic cable splicing and connection in FTTH access and backbone networks. The fiber dome structure adopts a mechanical sealing design, providing IP68 waterproof protection, stable re-entry performance, and long-term. In-line Horizontal Fiber Splice Joint Closure is used for direct connection and large capacity discontinuous connection of optical fiber cable, and plays a role of protecting optical fiber cable joint. It can meet the construction requirements for laying optical fiber cables, underground, pipelines. This Technical Datasheet suits for NTFOS2022 Splitter Splice Closure (Hereafter abbreviated as FOSC), NTFOS2024 splitter closure can install various kind of PLC or box splitter; it is especially for FTTH project. To ensure that the fibre optic connection blends harmoniously into the existing electrical installation, we offer the junction boxes in the design frames of the AS/A, CD and LS ranges. In this way, we. The versions of this sturdy polyamide enclosure with moulded-on Pg 11 cable gland reduce processing time and work • 5 sizes • Versions with or without screwing systems • Quick-release fastener versions • Transparent lids on request • . IP68 fiber dome design, ITU-aligned structure, modular capacity, and OEM/ODM branding by a fiber joint closure manufacturer.
