

Automatic Compensation Distribution Box

Overview

It is a new type of outdoor integrated distribution box with multiple functions such as power distribution, control, protection, reactive power compensation, and power metering. Leakage protection can also be added according to user requirements. TBBWZ series outdoor high-voltage reactive power automatic compensation device on column (hereinafter referred to as device) is suitable for 3kV, 6kV, 10kV transmission lines and installed on outdoor columns. TBBWZ. The introductory part of the paper gives the basic theoretical considerations of the ways of neutral point treatment in distribution grids with special reference to the method of neutral grounding of distribution transformers by a compensation coil. They were forced to produce as economically as possible. Now, new technologies have been developed compared with the past when capacitors were bigger and heavier.
