

COMSOL s magneto-optical modulator

Overview

This project focuses on the design and simulation of a Mach-Zehnder Interferometer (MZI) based optical modulator using COMSOL Multiphysics. The objective is to analyze phase modulation, interference-based switching, and voltage-controlled optical transmission in integrated photonic. The Wave Optics Module, an add-on to the COMSOL Multiphysics[®] software platform, is used by engineers and scientists to understand, predict, and study electromagnetic wave propagation and resonance effects in optical applications. Electro-optical sensors for measuring the electric field to become the main method due to the crystal optical fiber preparation and mature technology. The results show a value for cross-sensitivity of 3.27 mT/°C in a non-optimized configuration of the sensor and of 2. To control the optical properties with an. In 1875, John Kerr placed current-carrying coils in holes on either side of a glass slab, which created an electric field.

All-optical nonlinear activation function based on a Mach-Zehnder ...

The utilization of MO modulation for achieving optical nonlinear activation function represents a significant advancement over electro-optical and thermo-optical techniques. This method boasts a

Apr 26, 2026

The Magneto-Optic Modulator

Since the magneto-optic modulator has low impedance, the scientists hope it will be able to better interface with superconductor circuits. The team also took steps to make their modulator as

Jun 19, 2026

Computational Modeling of Magnetic Field Optical Fiber

With this panorama, this work analyzes through computational modeling a fiber optical magnetic field sensor, using the magneto-optical Faraday

May 05, 2026

Research on the Modeling of the Faraday Effect Based

In this paper, magneto-optical sensing system based on Faraday effect is applied in the measurement of the electric current and the principles and simulation models

Feb 27, 2026

Can anyone help me with magneto optical simulation

I am trying to simulate the magneto-optic Kerr effect for a nanoparticle, using the relative permittivity tensor, which the magnetic effect comes to off-diagonal terms

Jun 26, 2025

(PDF) Magneto-optical modulator for superconducting

The magneto-optic effect has a wide range of applications for the fabrication of microstructure devices, such as modulator, circulator, isolator,

Oct 28, 2025

Micromagnetic Simulation with COMSOL Multiphysics®

Read about how a guest blogger built a "Micromagnetics Module" in COMSOL Multiphysics® to study magneto-dipolar couplings, magneto-elastic
