

Cable tray crossarm hoisting

Overview

Horizontal hoisting is a common method for installing cable trays, especially when overhead support is available. Likely used for specific horizontal support. Equal/unequal sides; supports structures. Various customized brackets made from angle iron (e. The stand off bracket accessories trestle installation is suitable for cable trays used vertically against the wall (raised by 5. The MKS and SKS cable tray systems from OBO Bet-termann have a long tradition. For 45 years, the ro-bust systems, which have been tested for various areas of application, have been successfully em-ployed by planners and specialists in the field of elec-trical installations. With our many years of experience, we are one of the leading manufacturers in this field. Establishing partnerships. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.
