

Cable tray rail joint

Overview

A cable tray joint plate is a metal connector. Think of it as a bridge that creates a continuous pathway for cables. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction. Of course. OBO BETTERMANN has offered products and solutions for electrical installation for over 100 years. With our many years of experience, we are one of the leading manufacturers in this field. Establishing partnerships. Coated finishing available on demand. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is intended for instrumentation and control applications that require. MITA GRP cable tray is specified for rail cable containment throughout Network Rail and London Underground - GRP cable tray provides extreme corrosion resistance, zero halogen properties and high strength cable support. Strong and durable - Made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor applications.
