

Cable tray seismic support accessories manufacturer

Overview

For over 60 years, Eaton has manufactured TOLCO seismic bracing and B-Line series cable tray, strut systems, pipe hangers and more that support electrical, mechanical, plumbing, and fire protection applications. Eaton also provides seismic engineering services to support customers from pre-bid to. Since 1973, EAE Electric has been your reliable partner in busbar, cable trays, fit-out solutions, support systems and much more! We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events. Gripple Seismic Bracing systems are specifically designed and engineered to brace and secure suspended non-structural equipment. Seismic Bracing systems are specifically designed and engineered to brace and secure suspended non-structural equipment (VAV boxes, fans, unit heaters, small in-line pumps, etc.) and components (HVAC duct, conduit/ cable tray, and piping) within a building or structure to minimize damage from an. Designed with seismic protection effectiveness, structural stability, and scenario adaptability at its core, key details include standard “longitudinal + transverse” dual-direction braces (three-dimensional braces required for certain specialized scenarios). Designed with seismic protection.
