

Can a fiber optic router be used as a wired network router

Overview

For fiber, your router needs the right WAN connection, speed support, and Wi-Fi capabilities. Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't work. This means you don't need a specialized modem-router device, but your router must support high-speed Ethernet input. While many users ask if fiber internet needs a modem, it actually. A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Fiber routers are able to handle higher bandwidth demands and offer lower. Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Does that even exist ?

I have googled a bit but fiber is so complex and has so many variants it is hard to find scenarios similar to mine., Cat 6a) to fiber and back again.
