

Centralized Procurement of Network Security Equipment

Overview

A centralized procurement model, supported by an Importer of Record (IOR), simplifies global hardware deployment while reducing cost and operational risk. Negotiate better pricing, bulk discounts, and stronger supplier agreements. The European Union Agency for Network and Information Security (ENISA) is a centre of network and information security expertise for the EU, its member states, the private sector and Europe's citizens. ENISA works with these groups to develop advice and recommendations on good practice in. This document describes ordering Cisco physical, virtual, and containerized network security solutions, including: ● Cisco Secure Firewall Threat Defense (FTD). ● Cisco Secure Firewall Adaptive Security Appliance (ASA). This structure streamlines decision-making, standardizes processes, and optimizes resource allocation across the organization. Moreover, it's not just about buying equipment; it's about managing these assets throughout their entire. Centralized purchasing, also known as centralized procurement, is a strategic approach where all business procurement activities across departments and locations are managed through a single technology solution.
