

Climbing a Communication Tower

Overview

Specialized training programs teach climbers the necessary skills, knowledge, and techniques required to safely ascend, descend, and maneuver at heights. These courses cover topics such as the proper use of safety equipment, emergency procedures, first aid, and. In order to erect or maintain communication towers, employees regularly climb towers, using fixed ladders, support structures or step bolts, from 100 feet to heights in excess of 1000 or 2000 feet. Employees climb towers throughout the year, including during inclement weather conditions. A tower climber specializes in maintenance, installation, and decommissioning of cellular and radio tower components such as coaxial cable, antennas, radios, fiber-optic cable and broadcast equipment for cell phones, television, radio, etc. Safety One Training Develops Premier Fall Protection Training and Custom Programs to Keep Tower Climbers Safety and Certified. For Training Inquiries, call 1. Working on. The Competent Tower Climber & Rescue Training course curriculum is designed to help students establish a safe work environment, safe work practices, and the safe implementation of emergency procedures.
