

Color arrangement order of 8-core optical cable

Overview

Under the TIA/EIA-598-C standard, the universal 12-color sequence is: 1-Blue, 2-Orange, 3-Green, 4-Brown, 5-Slate (Gray), 6-White, 7-Red, 8-Black, 9-Yellow, 10-Violet, 11-Rose, and 12-Aqua. This sequence repeats for cables with more than 12 fibers. (48, 96, or 144 fibers), the industry uses a “Tube and Fiber” system. Example: What. The color arrangement for optical fiber cables is standardized to ensure consistent identification of individual fibers during installation, splicing, and maintenance. Hexatronic offers cables with color code systems according to all international and national standards and for all types of fiber optic such as a tube, ribbon, yarn wrapped bundle or other types of bundle. It plays a crucial role in ensuring the quality and efficiency of optical cable production.
