

Common Testing Equipment for Fiber Optic Connectors

Overview

Fiber testers provide the precision needed to install, certify, and maintain high-speed optical networks. This category includes OLTS certifiers, OTDRs, optical power meters, light sources, and visual fault locators. No setup or interpretation is required — just place it in front of the fiber end face or port, and a light and tone indicate an active fiber. See how. Fluke Networks has a wide range of Fiber Optic testing products to help certify that power losses are within standards and to troubleshoot broken and high loss links on single-mode and multimode fiber all with ease-of-use, accuracy, and durability. Get pass/fail results in seconds. Crucial for certifying new links or troubleshooting existing ones. Good OTDRs come with touchscreen interfaces, multiple wavelengths, and. AFL's Test & Inspection suite offers technicians rugged, easy-to-use tools for inspecting fiber endfaces, identifying faults, measuring optical loss, and managing test workflows.
