

Connecting Multi-Level PoE Switches

Overview

The most straightforward method for connecting two PoE switches is through their uplink ports, which are specifically designed for this purpose. PoE switches are designed to provide both data and power to network devices, eliminating the need for separate power cables and adapters. By connecting these switches, you can. Thus, multiple Ethernet switches are connected. But can you use the extend mode on TP-Links switches to connect two switches together up to 200m+?

The ads and product page only shows that you can extend each PoE to a camera or other PoE-device up to 250m. @eriklanden Hey No sadly not, its specific technology for IP Cameras Basically it turns the. Switches and switch connections are generally available in these two modes: cascading and stacking.
