

Connection method between power cable tray and truss

Overview

Splice Plates: Connect straight sections of tray together securely. Drop-Outs: Allow cables to exit the tray vertically to connect to equipment below. The cable support lengths and fittings can basically be designed as cable trays, cable ladders or mesh cable trays, in which cables are routed. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. Only. The B-Line series Cable Tray Manual was produced by our technical staff.
