

Connection of large and small openings in mesh cable trays

Overview

The answer: use the right connection accessories for a secure, aligned and continuous cable support system. In most cases, sections of wire mesh baskets or electrical cable trays are joined using couplers, bolts, or proprietary connector kits. Systems support and route all types of cables. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. At temperatures below - 20 °C, the material will be any other purpose than. In this document have been tested extensive competent professional completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray.
