

Correct location of the router's fiber optic port

Overview

The port on your modem or router should be located on the back or the side. Find a small hole (just the size of the cable is ok) where the cable goes out from the fiber network. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). After you have determined the main features, you want to find the port at your modem or router where you can plug in your device. Before diving into the connection process, gather these critical components: Optical Network Terminal (ONT): The cornerstone of most fiber setups, typically provided by your ISP. This. Contact us for solution, Call us on our toll free number - 1-844-765-4831 In This Video, You'll Learn: Compatibility Check: Before we dive in, let's confirm your router has an optical port (usually labeled SFP or PON). If not, you might need an additional media converter.
