

Data Centers and Modular Server Rooms

Overview

Modular data centers are pre-engineered, prefabricated, and standardized buildings, equipped with power and cooling, that house servers and network equipment. By combining resilient power systems, modular infrastructure, real-time monitoring, and intelligent network design, we help data centres operate with confidence in an increasingly. Our modular containerised buildings provide a climate-controlled and highly efficient and cost-effective solution within which to provide a secure and managed environment for computing and server applications. Within the buildings we can maintain a temperature and humidity controlled environment. Northstar Enterprise + Defense offer solutions with speed, performance and security in mind (Credit: Northstar Enterprise + Defense) Northstar Enterprise + Defence delivers turnkey solutions for AI/ML, enterprise, telecoms, defence and government applications, with a specialised focus on modular. Working with our Vertiv Sales team enables complex designs to be configured to your unique needs. If you are an organization seeking technical guidance on a large project, Vertiv can provide the support you require. Many customers work with a Vertiv reseller partner to buy Vertiv products for their. Remote Power Panels (RPPs) distribute power directly to the IT server racks or cabinets.
