

Delete network cable tray

Overview

Use the Delete tool to delete cable tray segments and components. The Cable Tray application allows you to remove Fixed Length Tray (FTUB) Components from all or part of a cable tray branch. If you are not at the branch or component level in the Model Explorer an error message displays summarising the problem, for example in the following window an error explains. Before any real work starts, you need to prepare. Proper preparation is key for a safe and efficient demolition. It involves several important steps. Click Manage tab Settings panel MEP Settings drop-down Electrical Settings. In the right pane, select a cable tray size, click Delete. On the Cabling tab, in the Cable Tray group, you can use the following tools. Before routing, consider the following guidelines: Cable tray lines are continuous, consisting of interconnected straight cable tray pieces and. Hmm, I'd say you can still remove the cable tray if you keep the smaller bar of it.
