

Design of Outdoor Distribution Box in Congo

Overview

Choose materials for exposure: indoor mild steel/ABS; outdoor stainless steel, aluminum, FRP, or UV-stable polycarbonate with gasketed seams. Prioritize security: indoor keyed/tool latches; outdoor multi-point locking, tamper-evident hardware, and door switches for remote. This article explores intelligent multi-power switching systems for factories, featuring a real 5-channel Congo distribution cabinet case integrating mains, solar PV, and diesel generators. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. Congo-Gilli to Maluku 220kV Transmission Line and Maluku 220kV Substation - Distribution Boxes Langsung Electric was involved in supplying a series of distribution boxes for the 220kV transmission line from Gilli to Maluku, along with the Maluku 220k. It is installed in a pit, does not occupy surface space, and can operate submerged in water for a period of time. The enclosure is manufactured from 1.5 mm carbon steel and finished with RAL2004 (orange) powder coating for high visibility and corrosion resistance. UV-resistant PC/ABS material, CE/TUV certified, custom knockouts available.
