

Distribution Box Specifications

Overview

XXM low-voltage lighting distribution box is suitable for single-phase and three-phase circuits with frequency of 50Hz, rated voltage below 400V, and load current not more than 100A. They can be designed for either surface-mounted wall installation or concealed recessed installation based on user requirements. Additionally, the. Wiring diagram shows both PNP and NPN wiring. Actual units use PNP status indicator or no status indicator. As lighting and. The Low Voltage Distribution Box is a compact and reliable solution for secondary power distribution in industrial, commercial, and residential applications. It is suitable for lighting and power distribution in various residential buildings, high-rise buildings, hotel buildings, shopping malls, hospitals. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
