

Distribution box AP-SYS

Overview

The equipment is used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system. The fiber splicing, splitting, distribution can be done in this box, and meanwhile it provides solid protection and management for the FTTx network. Material: PC+ABS, wet-proof, water-proof, dust-proof, anti-aging, protection level up to IP65. Cable, pigtails, patch cords are running through own path without disturbing each other. Fiber optic terminal box is available for the distribution and terminal connection of various kinds of optical fiber system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cords or pigtails are connected. The horizontal PDUs are 1U & 1.5U in height and are built using a tough aluminium extrusion. APsystems next-generation AC-coupled smart Energy Storage Solution for residential. The systems includes the ELS single-phase battery charger solution together with APsystems low voltage batteries, Also compatible with an expanding list of LiFePO4 battery brands*, it becomes the ideal AC-coupled.
