

Distribution boxes are installed according to xm

Overview

XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. This device serves as a pivotal element in managing electrical power distribution in various applications, including power generation, distribution stations, and transformation stations. In this article, we will delve into the specifics of the Distribution Box XM, its components, applications, and. Secondly, the distribution box boasts superior safety mechanisms, including built-in circuit breakers and surge protection. These technical parameters are essential for preventing electrical overloads and safeguarding both the system and users. It is suitable for terminal distribution in public buildings, residential buildings, and home decoration, and can also be used in power supply locations such as building lighting. XM series integrated distribution box/cabinet is a series of products developed by our company on the basis of absorbing the advantages of the current domestic popular distribution box/cabinet, the box/cabinet body is made of high-quality cold-rolled steel plate, processed by CNC machine tools.
