

Do galvanized metal cable trays need to be painted

Overview

Yes, galvanised steel can be painted for the following reasons: All paint systems used should be specifically formulated for use on galvanized steel and applied in accordance with the paint manufacturer's recommendations. As a galvanised cable tray manufacturer in India, we at ELCON Global cater to these diverse preferences. For enduring, low-maintenance cable support systems, galvanised trays. Hot-dip galvanization involves immersing the cable tray in molten zinc, creating a robust zinc-iron alloy coating. The process offers: This process uses electrolysis to deposit a thin zinc coating on the tray's surface. They help organize cables, improve accessibility for maintenance, and ensure proper airflow, which reduces the risk of overheating. It offers true freedom by allowing multiple configurations in a wide choice of finishes for optimal integration into any environment. Basor Electric, discover our products, downloads, tools and.
