

Does the intranet connection to the switch use fiber optic cable

Overview

Switches: Ethernet switches with built-in fiber optic ports allow for direct integration of fiber optic cables into the network infrastructure. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. Fiber optic technology has revolutionized data transmission, offering unparalleled speed and. There are two types of fiber optic cable: Singlemode (with a small core and used in the campus backbone for long distances) and Multimode (with a larger core and used in LAN networks for distances of hundreds of meters within the campus network). The fiber optic cable has a variety of connectors at. To connect your fiber optic line to an Ethernet-only network switch, you need a fiber optic-to-Ethernet converter box. These can behave like a typical Ethernet switch.
