Domini Large Span Cable Tray Models and Dimensions

Overview

The product range comprises cable trays and cable ladders with widths of between 200 and 600mm and side heights of 110 to 200mm. All the elements of the system are constructed in a ro-bust, long-life manner, in order to withstand the loads of everyday industrial work over a long. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable trays - Cable trays, wide span. In practice, cable tray dimensions are a system of interrelated measurements—width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability. 5mm) that protects against oxidation. First, the steel is chemical cleaned and roughened in order to achieve a good bond.
