

Dutch High Voltage Complete Equipment

Overview

A complete program of the most diverse components for suspending, tensioning, supporting and connecting conductors in high-voltage lines is available to you. Examples are for instance the maritime market, offshore, infrastructure and more. We operate in several different electrical specializations. The High Voltage Technologies (HVT) group is responsible for research and education in the fields of High Voltage AC and DC. Greening the grid with innovative insulation solutions to accelerate the energy. Balance of Plant (BoP) in power engineering refers to all systems, infrastructure, and works required to make a power asset operational, excluding the primary equipment itself. It can provide efficient and reliable power support, ensuring stable operation of equipment in various complex environments.
