

Ecuadorian cable tray seismic support brand

Overview

The EasyFlex EF5CK Series Seismic Cable Restraint Kits are engineered to secure suspended non-structural components—such as ductwork, piping, conduit, cable trays, and HVAC equipment—against seismic, wind, and blast forces. Cable trays are systems used for the safe transportation and protection of electrical cables, designed to fit the pathways within buildings and structural installations. Why is seismic bracing important?

International Building Code. Since 1973, EAE Electric has been your reliable partner in busbar, cable trays, fit-out solutions, support systems and much more! Brilltech Engineers Pvt. brings the Cable Trays in Ecuador just for you! We, one of the well-known Cable Trays Manufacturers in Ecuador, offer top-notch trays that keep your electrical system organized and protected. Our durable, high-quality trays come in various sizes and styles to fit any. Designed with seismic protection effectiveness, structural stability, and scenario adaptability at its core, key details include standard “longitudinal + transverse” dual-direction braces (three-dimensional braces required for certain specialized scenarios).
