

Environmentally friendly coating for distribution box body

Overview

Aqueous coating offers a water-based solution that is environmentally friendlier than traditional varnish or UV coatings. This coating dries quickly and provides a modest level of shine. Although plain corrugated cardboard can be an extremely durable form of packaging, many products need a little extra protection. This finish invites the consumer to focus on the subtleties of the packaging. Customized Eco-Friendly Solutions – From moisture, grease and oil-resistant barriers to FDA-compliant coatings for food packaging, Sierra Coating offers a range of made to order solutions that help brands meet sustainability standards. Companies are now pioneering a variety of green alternatives, including water-based formulations, plant-derived ingredients and. Picture walking through a lush forest, breathing clean air while the electrical infrastructure around you hums quietly, safe in the knowledge that every component in that distribution box nearby was created without harming our planet. The environmental impact of petroleum-based, non-biodegradable coatings used in single-use paperboard packaging is significant.
