

Estonian Base Station Communication Tower Company

Overview

Levira owns and operates the tallest transmitter towers in Estonia, including the iconic Tallinn TV Tower (314 m). Our network includes 22 masts and towers, some reaching up to 349 meters, ensuring extensive network coverage and optimal conditions for long-distance visibility. Since regaining independence in 1991, Estonia has developed from a poorly connected Soviet republic into one of the world's most advanced digital nations. During 1994-2009, the network of EDACS was operated – it was shut down in relation to bringing in ESTER, a new critical communications network based on TETRA technology, which covered the whole country. com ('the Site') and are legally binding on you. (NASDAQ: GSAT), a next-generation telecommunications infrastructure and technology provider, together with its wholly-owned subsidiary, Globalstar Europe SAS, today announces that construction has commenced to double the size of its existing ground station in Estonia to support the. We spoke to Indrek Lepp, EVP, Head of Media Services at Levira, the Tallinn, Estonia-based digital services provider about the company's proud history, current operations, future plans and how it is championing start-ups – as well as base jumping the 314m Tallinn Tower which is its home.

Telecommunications in Estonia

OverviewHistoryMarket structure and major operatorsCurrent telecommunications infrastructureDigital growth and e-governance

Prior to Estonia's independence in 1991, the country had poorly developed telecommunications infrastructure from the Soviet Era. In 1992, all international calls from the country were still routed through Moscow, and a rotary-dial phone was a sign of wealth. Less than half its population had a telephone line and its only independent link to the outside world was reportedly a Finnish mobile phone concealed in the foreign minister's garden.
