

European fiber optic cable disconnected

Overview

In a shocking development, the C-Lion1 undersea fiber optic cable connecting Finland to Germany was severed on November 18, 2024. This incident has raised serious security concerns and sparked speculation about potential sabotage. Significant internet outages in Finland have been attributed to a damaged fiber optic cable. The Baltic Sea region has seen several cases of suspicious damage against underwater critical infrastructure since 2022, but this week's. The damage to the data cable between the two nations follows incidents of suspected sabotage involving underwater cables in the Baltic Sea. A cybersecurity expert tells Yle that the cable break is likely to be intentional. The cable, operated by Finnish public operator Cinia, plays a
