

Fiber Optic Cable Anti-vibration Whip Material

Overview

The screw anti-vibration whip is made of a high-strength, age-resistant, highly elastic engineering plastic, and the material is non-metallic, which will cause any mechanical damage to the cable cloth. Spiral vibration dampers have a helically-formed damping section sized for interplay of damper and cable to provide the action/reaction motion that opposed the natural vibration wave. Vibration dampers are used to absorb aeolian vibrations of conductor of transmission lines, as well as ground wire, OPGW, and ADSS. Purpose: Suitable for ADSS optical cable. It is an interference type damper designed to attenuate the energy of cable vibration and restrain cable vibration. Composition: It is composed of a gripping section and a damping section.
