

Fiber Optic Cable Blocking Piece

Overview

This heavy-duty fiber block is used for supporting a single fiber optic cable up to one inch dia. onto a maximum strand size of 3/8 in. Particularly recommended where a higher level of security is required such as crossing roadways or waterways. These product can be used as an Infeed Guide or as an Outfeed Guide for Fiber Cable to prevent breakage, which can occur on some standard quadrant blocks. Protects OPGW and ADSS cable during installation. Replacing traditional aluminum rollers with three sections of high density nylon provides over 45 contact inches of cable support - significantly reducing the occurrence of micro bends during. U-TECK's New RayDius™ Fiber Quadrant Blocks are designed to protect fiber optic cable during installation. Since 1970, Budco has provide cable construction tools, cable installation tools, and cable identification tools including fiber optic test equipment and tools for the telecommunications industry.
