

Fiber Optic Cable Unpacking

Overview

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. We will cover the unpacking of the closure and the preparation of the CAU for cable entry. Every piece in the Apex closure is field replaceable, so you can easily repair or replace any damaged. Fiber Optic Center's Cable Prep Video Library displays product demonstrations and overviews for the following Cable Prep product lines: Cable processing, Cutting, Coiling, Respooling, Cable stripping, Fiber stripping and Furcation tubing. Consult the cable specification sheet for the cable you are installing. It is imperative that certain procedures be followed in the handling of these cables to avoid damage and/or limiting their usefulness. Before any splicing can occur, whether it's mechanical or fusion. Cable Preparation and Pulling Procedure Best Practices for Fiber Optic Indoor Tight-Buffered Cable © Panduit Corp. 2009 BEST PRACTICES PN447B Table of Contents 3 2.
