

Fiber Optic Coupler Little D

Overview

Fiber Type Single Mode Connector Type FC Shape Small D Type Storage Temperature -50°C~+85°C Fiber optic couplers are used to link fiber patch cables or fiber optic connectors. They are reliable in performance. It provides an expert-curated supplier directory, buyer-focused technical background information, and structured selection criteria to support professional procurement decisions. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. L-com's line of simplex and duplex APC couplers feature tightly tolerance slots to assure proper orientation of mated APC connectors. In order to achieve low back reflection values some fiber assemblies utilize a connector with an Angled Polish Contact (APC). 1x2 couplers are manufactured using the same process as our 2x2 fiber optic couplers, except the second input port is internally terminated using a proprietary method that minimizes back. Fiber-optic couplers are used to split or combine the light contained in optical fibers.
