

Fiber optic cable sdgi

Overview

SDGI is one of the earliest high-tech enterprises in China to develop and focus on optical fiber and cable, providing various types of outdoor optical cables such as duct, aerial, direct buried, underwater, and other types. Indoor optical cables are mainly used for optical network wiring in. The industrial business of SDGI covers such fields as the Optical fiber and optical cable, Intelligent Network and Military industry information. With the widely application of Fig-8 self-supporting optical cable, hardware fittings for Fig-8 cable are widely used at present. These kinds of fittings are not only Easily to install by hand and conveniently to use with low operation cost, but also are more convenient for installation and acceptance. Optical fiber cables are a cornerstone of modern communications. They utilize light to transmit data, which allows for high-speed data transfer over long distances. This type of cable is particularly. SDGI Cables, also known as SDGI (Specialized Durable Grade Industrial) cables, refer not just to a product line, but a class of robust, industrial-grade cable systems built to endure demanding conditions, ensure safety, and comply with global standards. Often seen in construction blueprints.
