

Fiber optic internet wireless router not replaced

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. This guide will break down everything you. But I'm not too sure what I need to do on the new wireless router to make it work?

Any and all advice is much appreciated! Look at the WAN settings on the "old wireless router" and compare to the TP-LINK router to make sure they are setup the same. This was it! It was configured for static IP so I. My internet service provider is having an infrastructure overhaul, switching every home to fiber optic from coaxial. The problem that I'm having is that this new modem doubles as a. Are you considering replacing your router?

If your router is more than 5 years old, has connection issues, or if you just want to improve your range and speed, it may be time to replace your old router. That's because it won't be Wi-Fi 7 compatible and is likely causing a bottleneck.
