

Fixing the suspended optical cable

Overview

Fix the cable to the pulling rope / tape using a specially designed pulling grip for optical fibre cable (length of 600mm minimum) to ensure that the pulling tension is well distributed on all cable components (outer sheath and reinforcing elements). ADSS cable accessories are simply fittings that are used to fix the ADSS cables to the poles so that the cables can perform their duties as required.) in pole-mounted applications becomes essential. At Gcabling, we provide a complete set of reliable, corrosion-resistant tension clamp. Don't let cable woes ruin your streaming binge or video conference; instead, explore these six proven ways to troubleshoot and fix your optical cable issues. Before diving into solutions, it's crucial to understand what an optical cable is and how it works. Dead-end clamp for ADSS/OPGW simplifies to a single-layer component, providing an economical solution for very light loads. We spend a lot of time and cost for new products development and test to produce various clamps and brackets for medium span cable line deployment.
