

H3C switch with 2 aggregation uplink ports

LoRawan outdoor base station

Overview

H3C S6520X-HI Switch Series —Industry-leading high performance and scalable 10GE access switching solution with modular dual power, fixed or modular uplinks (10GbE/40GbE/100GbE) and IRF for resiliency. The series offers OSPF/BGP and multicast, SDN enabled and flexible management. · Configure Layer 2 static link aggregation for the two uplink interfaces connecting the AP and the access switch. Configure load balancing based on source and destination MAC addresses for data traffic to be load balanced among different member ports of the aggregation. You can configure the load. If you need dense 10G fiber access with 100G uplinks (and room to grow with interface modules), start with S6520X-30HC-EI / S6520X-54HC-EI: they ship with QSFP28 100G uplinks that can break out to 4×25G. It provides up to 48/24×1GE/10GE/25GE autosensing SFP28 ports and 8×100G ports. By using different. As Gigabit speed Layer 2 Ethernet switch, H3C S5130S-LI is the second generation intelligent managed switches designed for networks requiring high performance, high port density, high uplink bandwidth and easy to use.
