

Haitian Standard Distribution Box Models and Specifications

Overview

This document provides specifications for various types of plastic distribution boxes, including their dimensions and features. It describes HA, HK, and LGD series boxes with dimensions ranging from 100-415mm in length, 105-323mm in width, and 75-140mm in height. Covering clamping forces from 600 kN to 12,000 kN, this series combines innovative technology with user-centric design. Featuring high-efficiency servo systems. Injection performance improved Optimized plastification unit Clamping unit structure improved Electrical charging as standard Energy saving facilities Cooling/thermal control optimization HT Clamp HT Lubricate HT Integration Electrical parts Hydraulic parts Haitian MARS Series Highlights at a Glance. Welcome to our comprehensive download center for JU Series machine specifications and technical documents. Multiple outlet power strips are manufactured in accordance to Haiti standards with agency approvals.
