

High Voltage Cable Tray Marking Requirements

Overview

When cable trays contain conductors rated over 600 volts they are required to be marked “DANGER — HIGH VOLTAGE — KEEP AWAY” at no further than 10-foot intervals. Code Change Summary: New marking requirements were added for cable trays. That hasn't. cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. association representing the major electrical equipment manufac-turers in the U. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extens ompetent professional en completely installed, without damage either to conductors or. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design solutions from practical experience.
